PAGE-1-MARKER

This is page one of the dsh-doc-reader PDF fixture.
The document contains exactly three pages.
Each page carries its own unique ASCII marker so tests can
prove that extraction walks the whole document.
Content streams are stored uncompressed for portability.

PAGE-2-MARKER

Page two continues with ordinary descriptive prose.

Automated tests count the pages and check that every marker is present in the extracted text.

There is no scanned image anywhere in this file.

PAGE-3-MARKER

Page three is the final page of the fixture.

Total page count: three.

End of document.
